

EVAN BARTLETT

Interactive Designer & Developer

PROFILE

I live in the digital world.

While striving to keep up with the never-ending changes in technology, delivering a unique and fresh platform to each client is my pure intention to keep their customers engaged. Over the years, I have had the pleasure of doing this for a multitude of brands such as Chevy, Navy, USPS, Alltel, FMS Shoes, mophie and Famous Stars & Straps.

My specialties include (but are never limited to) creative thinking, interactive design/development and social integration. These days I work primarily with a mixture of HTML5, CSS, jQuery, PHP and MySQL, though I hold many more in my vault.

Let's chat!
